CAREER SUMMARY:

Full Stack Developer with 4 years of experience building responsive, scalable web applications using React, Node.js, Express, MongoDB, MySQL, and Python. Strong foundation in AI and machine learning, with a creative approach to solving complex problems. Committed to delivering impactful, user-focused solutions and driving innovation through modern technologies

WORK EXPERIENCE:

Automattic

Full-Stack Developer (Remote) | 03 March, 2021- 05 June, 2025

- Built and deployed full-stack web apps using React, Node.js, and WordPress REST API, following Automattic's open-source principles.
- Built dynamic, responsive user interfaces with HTML, CSS (Tailwind/Bootstrap), and JavaScript.
- Integrated RESTful APIs and third-party services like Stripe and Firebase to enhance functionality.
- Deployed projects using Docker, Vercel, Netlify, and AWS, ensuring seamless user experiences.

Northumbria University, Head of IT Department, London

Software Engineer Intern | Jan 2024- Jan 2025

Contributed to software development and machine learning research projects, combining backend development, data engineering, and applied AI techniques. Gained practical experience across the full development lifecycle using both JavaScript and Python-based technologies.

- Built and tested RESTful APIs using Node.js and Express, and connected backend services to MongoDB databases
- Assisted in developing Python scripts for data preprocessing, automation, and ML pipeline integration
- Trained and evaluated machine learning models using scikit-learn and TensorFlow for academic and applied research
- Developed data visualisations and dashboards using Pandas, Seaborn, and Matplotlib
- Collaborated in a cross-functional team to document research findings and improve code efficiency

Tech Stack: Node.js, Express.js, MongoDB, Python, TensorFlow, scikit-learn, Pandas, NumPy, Seaborn, Matplotlib, Git, REST APIs

Myanmar Golden Eagle Co., Ltd – Glass Bottle Manufacturing

Full-Stack Developer | May 2023 – Dec 2023

Delivered full stack web solutions to support production, inventory tracking, and resource management in a factory environment. Worked across both front-end and back-end systems to enhance operational efficiency and digitalise internal workflows.

- Designed and developed dynamic web interfaces using HTML, CSS, and JavaScript
- Built scalable backend services and APIs with Node.js and MySQL for data storage and processing
- Created custom dashboards for real-time monitoring of manufacturing and inventory data
- Implemented role-based access control (RBAC) to secure internal systems
- Collaborated with cross-functional teams (engineering, operations, QA) to define, test, and deploy new features
- Maintained clean, modular, and well-documented codebase to support ongoing maintenance and future development

Tech Stack: JavaScript, Node.js, Express.js, MySQL, HTML5, CSS3, REST APIs, Git

SKILLS:

Programming Languages:

- JavaScript (ES6+), Python, SQL, HTML5, CSS3

Web & Backend Development:

- Node.js, Express.js, REST APIs, MongoDB, MySQL, Git, GitHub

Machine Learning & Data Science:

- TensorFlow, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Tools & Platforms:

- VS Code, Postman, Git, GitHub, Jupyter Notebook

Methodologies & Practices:

- Agile (Scrum), Test-Driven Development (TDD), Version Control, Documentation, Role-Based Access Control (RBAC)

EDUCATION:

2024 - 2025 | Northumbria University London

BSc (Hons) Computing with Artificial Intelligence Technology – First Class Honours

2020 - 2023 | Info Myanmar University (in partnership with Pearson UK)

Higher National Diploma (HND) in Computing – Distinction
